Publication Stage :

(B1) U.S. Patent (no pre-grant pub.) after Jan. 2, 2001

Abstract :

A protective garment comprises an outer shell, which provides abrasion resistance and puncture resistance, a thermal liner, and a liner including a moisture barrier. Each liner being adapted to be separately and detachably attached to and within the outer shell. The garment is adapted to be selectively configured with neither said liner so attached or with the thermal liner so attached, for a firefighter fighting a wildland fire, with both said liners so attached, for a firefighter fighting a structural fire, or with the liner including the moisture barrier so attached, for a firefighter engaging in a technical rescue.
